

SiPCiC

Network Intelligence has added ***SiPCiC*** to the family of ***SiPSuite*** services.

Save 20% or more on your existing 1+ and FGD traffic with ***SiPCiC*** services from *Network Intelligence*. Legacy 1+ and FGD traffic can now be migrated into an IP infrastructure while dramatically lowering the cost of terminating traffic. ***SiPCiC*** enhances your switched service product offering with CIC Transport, Pseudo-CIC Transport and termination to multiple IP carriers of your choosing in a custom designed LCR for termination of traffic.

SiPCiC Services

- SIP-based Pseudo-CIC Transport:
 - Nationwide Origination and Transport
 - Feature Group D, 1+, 011 and Operator Services
 - Multiple Tier 1 Carriers
 - ANI's are pre-subscribed to CIC'd Carrier
 - Converts existing TDM to SIP
 - ***SiPCiC*** Only the most cost effective routes
 - Hands off calls to N.I. Switch
 - National or International Termination product
 - Multiple Carriers of your choice
 - Session Border Control and Security
 - *IntelliRoute* LCR™
 - Least Cost Routing increases your savings
 - Savings of 20% over traditional 1+ Solutions

BENEFITS

- Originating traffic is converted to IP for security and reduced cost
- Expand your market without incurring costs to deploy feature groups
- Only the most profitable routes are CiC'd
- Multiple Tier 1 carriers of your choice now terminate your traffic
- Session Border Control
 - Increases security
 - Hides network topology
 - Eliminates fraud
- No Mark up on Carrier rates with *IntelliRoute LCR*
- Typical savings of 20% over legacy 1+ solutions
